REGAIN YOUR FEMININE ESTEEM

pk24 brings joy and intimacy back into sexual relationships

Vaginal relaxation can arise due to several factors, namely childbirth, aging, and poor muscle tone. For centuries, this taboo subject has left millions of women across the globe suffering in silence.

The condition, which is due to an increased diameter in the vagina, can cause diminished sensation and gratification during sexual intercourse. As a result, a woman and her partner can both be left sexually dissatisfied, affecting the woman's self-esteem and eventually, hampering the relationship between her and her partner.

While surgery was once the only rejuvenation option to tighten the muscles of the vaginal wall, a revolutionary non-surgical option is now available for the first time in Malaysia, allowing women to take necessary action to dramatically improve their sexual experience with their partners, and ultimately add joy to their intimate relationships.

WHAT THE DOCTORS SAY:

Dr. Nimi Sutina:

They love it! Most of them are in their mid-30s and 40s. They feel better lubricated and are experiencing increased sensation during intercourse. As a result, both partners are satisfied.

Dr. Lim Wye Leng:

Most of my patients have been the perimenopausal ones. They say that pk24 has made intercourse more enjoyable, whereby the experience was previously uncomfortable due to dryness.

Dr. Inder Kaur:

My patients are very happy after using pk24, particularly those who have had several children. At first, they did not believe it would work, and now, after experiencing the instant results, they are happier in their relationships and their improved self-esteem is so evident.

Dr. Jeyanthi Vellupillay:

My patients love it! I can't say more. It has improved their marriage tremendously due to mutual sexual satisfaction. Both partners are much happier. Some have even shared information on pk24 with their close friends!

WHAT ARE THE INGREDIENTS IN

The proprietary blend of FDA-approved ingredients is formulated to hydrate the interior walls of the vagina, which creates a tightening effect that can enhance sensation and sexual pleasure. pk24 is made of aloe barbadensis leaf, a soothing plant extract; glycerin, a natural moisturizing ingredient; alum potassium, a naturally occurring mineral; sodium citrate, an anti-antioxidant and natural preservative; peg-75 for fragrance; sucralose for flavor; and methylparaben and propylparaben, common preservatives which are water soluble. appear hydrated, firmer and more toned.

Renewed Sense of Sexual Vitality and Empowerment

Women everywhere now have a safe, non-surgical option to address the issue of vaginal relaxation with the introduction of pk24, which is the first and only clinically tested, anti-aging vaginal rejuvenation cream formulated to hydrate the internal vaginal wall and create a youthful tightening effect.

"Such a cream is now a wonder tool for most of us doctors to offer our patients, particularly those who suffer from vaginal relaxation as a result of childbirth and aging," says Dr. Inder Kaur, who explains that pk24 is a light-weight and non-irritating cream which is convenient and easy to use.

Dr. Nimi Sutina adds, "The cream 'rejuvenates' the skin lining by hydrating it and indirectly making it more supple and firm – this creates a tightening effect locally, thus creating greater sensation during intercourse, which ultimately brings greater sexual pleasure for both partners."

The cream, which is safe to use, is fast becoming the preferred option for vaginal rejuvenation over surgery – which can be costly and also instills fear in surgery-averse patients.

"The product has completed clinical trials in the U.S. to evaluate its safety for women. When used as directed, pk24 produces no known adverse side effects. However, pk24 is not recommended for use if you are experiencing any vaginal disorders and is not intended to treat or cure any disease or ailment," explains Dr. Lim Wye Leng.

Another added benefit of pk24 is that it is fuss-free and easy to use. It comes in a pump dispenser, and only a small dime-sized

amount needs to be applied to the tip of the middle finger and gently massaged into the interior vaginal walls. The tightening effect can start in as little as 10 minutes after application and lasts up to 24-36 hours.

The effectiveness of pk24 does not diminish over time, and the formula continues to be highly effective with repeated use – in fact, two applications over the course of a day will produce a more dramatic tightening effect.

"pk24 appeals to a range of women who are active sexually and would like to further enhance the sexual relationship with their partners, falling anywhere between the ages of 20 right up to the 70s," says Dr. Jeyanthi Vellupillay. She adds, "The cream is also useful for mothers who have had more than two children and are experiencing poor control of their vaginal muscles."

THE GRATIFYING RESULTS AFTER USING

Women who desire optimal sensual and sexual gratification are reporting great benefits after using pk24, which was created to bring desired youthfulness back to an important part of the body, and renew a sense of sexual confidence and empowerment. During clinical trials, 89% of subjects report an increased level of sexual arousal during sexual activity or intercourse. Beyond the increase in sensation, many say that pk24 has improved intimacy with their partner.
